Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bardy '423.

Bardy is considered to render obvious all of the subject matter of the above claims. Specifically, Bardy teaches a device which can stimulate the gastrointestinal tract of a patient, including a computer 62, a transmitter 64 and an internal electrode 9. In column 7, lines 1-16, it is taught that various preprogrammed stimulus waveforms can be generated and used to stimulate the patient. The physician who programs the device would know what types of waveforms would best stimulate a specific function, as taught on lines 13-16 of column 7. Thus, the computer system of Bardy is considered to be analogous to, and therefore obvious over, the storage area called for in applicant's claims.
